# Document History

Revisions			
Date	Version	Description	Author
10/06/2022	1.0	Initial release	CFTC
03/15/2023	1.1	Deleted price and updated Part16 to Part17 on page 1. Data Dictionary Field name changes: #21 Alpha Strike, #32 Long Position, #33 Short Position, #34 Contracts Bought: definition update, #35 Contracts Sold: same changes as previous, #36 EFPs Bought, #37 EFPs Sold Tag, #44 - # 47 if no options/futures are made as described in the description, then populate with "0". Added fields after #47: Long Futures Assigned, Short Futures Assigned. Added fields after #48: Long Transfers Sent, Long Transfers Received. Added fields after #49: Short Transfers Sent, Short Transfers Received. Updated description in #48 and #49 to not include give-ups. 3.9.1 table updated with FXML path for Alpha Strike to /PosRpt/Instrmt@AlphaStrk.	CFTC
03/27/2023	1.2	Changed the Date format for Listing Date from 'YYYYMMDD' to 'YYYY-MM-DD'. Changed the Data Element name from Earliest Exercise Date to First Exercise Date.	CFTC
3/31/2023	1.3	Add Long and Short positions sent/received. Changed Tag descriptions. Changed the conditional statements and added audit details.	CFTC
4/18/2023	1.4	Corrected format issues. Added, removed or changed wording on certain sentences. Fixed MatTm valid value by removing the date part. Removed paragraphs which are irrelevant to part 17.	CFTC
5/26/2023	1.5	Made description changes to data elements Contracts Bought and Sold. Made a change to data element name for item numbers 24 and 25.	CFTC
5/30/2023	1.6	Updated Alpha Strike Description.	CFTC

### Guidebook for Part 17

03/18/2024	1.7	Added Unique Instrument Code. Added Unique Instrument Code to all examples. Made a minor change to Report ID Description. Added more clarification to the tag description. The length increased to 50 for Settlement Instrument – Product Code and Changed Unique Instrument Code to conditional tag.	CFTC
3/28/2024	1.8	Made changes to validations , data dictionary data types (no fields added) and key section 3.10.1	CFTC
4/16/2024	1.9	Updated datatypes. Small wording and page numbering corrections.	CFTC
12/17/2024	2.0	Updated AltID path and corrected file name convention.Moved validations 9 and 10 to the end of validation table in appendix B. Added 3 additional validations and deleted validations #2, 12 thru 20. Updated Validations with FIXML paths.Updated and added new validations. Corrected the FIXML path in the examples. Removed Underlying ID and MMY from composite key. Settlement Instrument – Product Code and Settlement Instrument - Contract Date changed from conditional to optional. Product Code, Product Type, Instrument Code, Contract Date, Long and Short quantity were changed from mandatory to conditional.Account ID length is changed to 12 from 20. Changed Data Element names to match PRF (Product Reference File) Guidebook (provided to DCMs).	CFTC

# 1. Introduction

## 1.1 Large Trader Reporting Program

The CFTC operates a comprehensive system of collecting information on market participants to support its market surveillance program and other programs throughout the Commission. Under regulations set out in Part 17 of the CFTC's regulations, promulgated under the Commodity Exchange Act (CEA), the Commission collects reports identifying volume threshold, omnibus, and special accounts as well as position information from clearing members, Futures Commission Merchants (FCMs), foreign brokers, and certain reporting markets.

To ensure privacy of the information provided, the CFTC has assigned confidential reporting numbers to reporting firms and traders. The Commission is prohibited under Section 8 of the CEA, 7 USC 12, from publicly disclosing any person's positions.

### 1.1.1 Large Trader Data

Under the Commission's Large Trader Reporting System, clearing members, FCMs, foreign brokers, and certain reporting markets (collectively called "reporting firms") file daily reports with the Commission under Part 17 of the CFTC's regulations, 17 CFR Part 17. The reports show futures and option positions of traders with positions at or above specific reporting levels as set by the Commission. Current reporting levels are found in CFTC Regulation 15.03(b), 17 CFR 15.03(b). (For more information, see <https://www.cftc.gov/IndustryOversight/MarketSurveillance/LargeTraderReportingProgram/index.htm>)

If, at the daily market close, a reporting firm has a trader with a reportable position according to CFTC regulations 15.00(p)(1)(i) and (ii), the firm reports that trader's entire position in all futures and options expiration months in that commodity, regardless of size.

Because traders frequently carry futures positions through more than one broker and control or have a financial interest in more than one account, the Commission routinely collects information that enables its staff to aggregate related accounts.

Specifically, reporting firms must file a CFTC Form 102A: Identification of “Special Accounts” to identify each new account that has a reportable position

The CFTC uses various means to ensure the accuracy of its large trader data. Where the CFTC identifies discrepancies in data submitted pursuant to regulation 17.00(a), an inquiry is made to the appropriate exchange and/or reporting firm.

The term “legacy” is used in the guidebook to reference the old 80-byte format (legacy).

Generic	Specific
Legacy	The Old 80-byte report format

See Appendix D: [80 Byte Comparison to FIXML](#) for a comparison between the 80 byte and FIXML formats.

See Appendix E:[Legacy File Format](#) for details about the 80 byte format.

See Appendix F:[Map Part 17 Large Trader Data to FIXML](#) to see how the 80 byte data is mapped to FIXML

## 3 Technical Requirements

### 3.1 Reporting Schedules

Reports filed under Section 17.00(a) must be submitted through electronic data transmission procedures approved in writing by the Commission or its designee not later than 9 a.m. on the business day following that to which the information pertains. Unless otherwise specified by the Commission or its designee, the stated time is eastern time for information concerning markets located in that time zone, and central time for information concerning all other markets.

Reporting Time for § 17.00(a) Reports	
9:00 AM (Local Mkt Time)	LTPoS

The definition of business day in § 1.3 of the Commission's regulations includes all days except Sundays and holidays. For the purposes of complying with Part 17, reporting firms may elect to not consider Saturdays to be a business day, as Saturday is not commonly known as such. Instead, reporting firms may submit Part 17 data records under the schedule displayed in the following table. In the table, the submission day is the day of the week that the relevant report for the associated reporting day is expected by the Commission. The time during the day that reports are expected is unchanged from § 17.02(a).

The reporting schedule displayed in the table below does not consider holidays. To the extent that a U.S. Federal government holiday falls on the submission day, it is permissible for the submission of the applicable Part 17 data record to occur on the business day immediately after the usual submission day. Please note that any submission made under Part 17 can be made prior to the relevant submission day shown below. Early submission is beneficial in that it may allow the Commission to review your submission earlier and provide more timely feedback regarding the acceptability of the file structure and data contents.

Reporting Schedule for § 17.00(a) Reports						
Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday

Report Day	Tuesday	Wednesday	Thursday	Friday	Monday	Monday	Monday
Submit Day							

## 3.2 Electronic Data Submission Procedure

If reporting for an account the first time, identify the special account to the Commission on Form 102A and submit the form via CFTC Portal at <https://portal.cftc.gov/>.

Information on Form 102A can be found <https://www.ecfr.gov/current/title-17/chapter-I/part-17/appendix-Appendix%20A%20to%20Part%2017>

## 3.3 Format the Data for Transmission

Consolidate the records into an XML-formatted file following the FIXML Position Report, as described in Section 2, Data Dictionary for Large Trader Reports. See <https://fiximate.fixtrading.org/> for more details.

Make sure that your XML contains the FIXML message tag with the namespace. See sample messages in Appendix C.

### 3.3.1 Reserved Characters

Some characters have a special meaning in XML. If you place a character like "<" inside an XML element, it will generate an error because the parser interprets it as the start of a new element.

This will generate an XML error:

```
<message>if salary < 1000 then</message>
```

To avoid this error, replace the "<" character with an **entity reference**:

```
<message>if salary &lt; 1000 then</message>
```

As shown in the table below, there are 5 predefined entity references in XML. If the indicated characters appear in data fields, ensure they are replaced with the appropriate entity reference value.

Code	Character	Meaning
&lt;	<	less than
&gt;	>	greater than
&amp;	&	ampersand
&apos;	'	apostrophe
&quot;	"	quotation mark

### 3.3.2 Special Characters

Non-printable and special characters are not supported by all systems. They are often translated or interpreted erroneously and may cause data processing issues. There are 256 ASCII characters, including the extended ASCII character set. To reduce confusion over which characters can be processed, ASCII characters can be classified in the following groups:

ASCII Character	Meaning	Status
0-9, 11-12, 14-31	ASCII Control characters	NOT ALLOWED
10, 13	Control characters for line feed (LF) and carriage return (CR), respectively	Allowed
32-126	Standard printable characters (letters, digits, punctuation marks, miscellaneous symbols)	Allowed
127	Control character for DEL (delete)	Allowed
128-255	Extended ASCII (ISO-8859-1)	NOT ALLOWED

Many currency denominations and foreign symbols fall under the extended ASCII character set. For this reason, any reference to currency denomination should be reported as the three-letter alphabetic ISO 4217 currency code (e.g., USD, GBP, EUR, JPY) rather than a translated currency name or ambiguous currency symbol (e.g., \$, £, €, ¥).

## 3.4 File Naming Convention

The Commission uses file names to facilitate routing inbound data files to the appropriate processing application. Each file must contain data for a single reporting firm for a single date. Do not combine records from 2 different dates or two different reporting firms.

For the Large Trader Position report the file naming convention is:

LTPOS\_[IDENT]\_[Sender ID]\_[YYYYMMDD].[EXTENSION]

**IDENT:**

This field is the 3-5 character identifier provided by the CFTC during the account registration process that is assigned to the submitting entity.

**Sender ID:**

This field is either the CFTC-assigned 3 character Alpha code assigned to the responsible reporting firm or the name of the servicing firm entity for third party filings to represent the on behalf of ID. The name of the servicing firm may be up to 20 characters in length.

**YYYYMMDD:**

This field is the calendar date in string format of the data being reported in YYYYMMDD date format.

**EXTENSION:**

This refers to the file extension .fixml

**File Naming Convention - Direct Submission Files**

The following examples represent Large Trader Position data submitted directly to CFTC by a firm with the CFTC reporting identifier “ABC”:

LTPOS\_ABC\_ABC\_20160601.fixml (FIXML Large Trader Position Rpt)

**File Naming Convention - On Behalf Files**

Third parties can submit reports on behalf of a reporter. The following examples represent Large Trader Position data submitted to CFTC by a servicing firm with the Sender ID “DEF” on behalf of a firm with the CFTC reporting identifier “ABC”:

LTPOS\_ABC\_DEF\_20160601.fixml (On-Behalf-Of FIXML Large Trader Position Rpt)

### File Naming Convention – Test Files

CFTC has established user acceptance test (UAT) environments for testing data files during development. Use the following naming convention to distinguish test data files from production reports:

LTPoS_ABC_ABC_20160601_TEST.fixml	(Test FIXML Large Trader Position Rpt)
LTPoS_ABC_DEF_20160601_TEST.fixml	(Test On-Behalf-Of FIXML Large Trader Position Rpt)

## 3.5 Aggregate the Records

The example below shows how we receive data currently in 80 byte format and how we expect the data to be aggregated in the FIXML format. The Part 17 Large Trader data report has been submitted using an 80-byte columnar data format. That format required separate reports (rows) for each count (RP/DN/EP) being submitted. Transition of the report to the FIXML Position Report message eliminates duplicate data entry, consolidating all counts under one report, while also eliminating the need for encoding numeric values for sign and decimal point location. Reporters should submit a single FIXML Position Report for each account and contract that contains all related quantities for the reporting date. The table below represents how the 80 byte record format compares to the FIXML format.

Reported Quantity	80-Byte	FIXML
EOD Position Long/Short	✓	✓
Delivery Notices Issued/Stopped	✓	✓
ERFPs Bought/Sold	✓	
Exchange for Physicals <sup>11</sup> Bought/Sold		✓

<sup>11</sup> An EFP transaction involves the simultaneous execution of a futures contract and a corresponding physical transaction or a forward contract on a physical transaction, or any similar transaction commonly known to the trade as an EFP.

## Commodity Futures Trading Commission

### Division of Data

### Guidebook for Part 17

Exchange for Options <sup>12</sup> Bought/Sold	V
Exchange for Swaps <sup>13</sup> Bought/Sold	V
Total Contracts Bought/Sold	V
Options Expired Long/Short	V
Options Exercised Long/short	V
Futures Assigned Long/Short	V
Long/Short Transfers Sent/Received	V

Previously the report for an account in an exchange-listed futures contract could have up to three rows in the 80-byte format:

Report Type	80-Byte					
Reportable Position	RPZZZ	00000000100C2016030102	S	201606	0000000	00001650000000
Delivery Notice	DNZZZ	00000000100C2016030102	S	201606	0000000	00001000000000
Exchange for Physicals	EPZZZ	00000000100C2016030102	S	201606	0000000	000000000000100

The new report for an account in an exchange-listed futures contract could have a single report with up to five counts in the FIXML format:

<sup>12</sup> An EOO transaction involves the simultaneous execution of options and a corresponding transaction in an over-the-counter option, or any similar transaction commonly known to the trade as an EOO.

<sup>13</sup> An EFS (also known as EFR) transaction involves the simultaneous exchange of a futures contract and a corresponding swap or other derivative transaction, or any similar transaction commonly known to the trade as an EFS or EFR.

Report Type	
Reportable Position	<PosRpt RptID="1" Actn="1" BizDt="2016-03-01" MsgEvtSrc="LTPOS" TxnTm="2016-03-01T14:00:00-06:00"> <Pty ID="ZZZ" Src="M" R="116"/> <Pty ID="100C" Src="D" R="89"/> <Instrmt ID="S" Src="H" SecTyp="FUT" MMY="201606" Exch="XCME" /> <Qty Typ="FIN" Long="165" Short="0"/>
Delivery Notice	<Qty Typ="DN" Long="100" Short="0"/>
Exchange for Physicals	<Qty Typ="EP" Long="0" Short="100"/>
Exchange for Swaps	<Qty Typ="ES" Long="0" Short="100"/>
Total Contracts Bought/Sold	<Qty Typ="TOT" Long="165" Short="0"/> </PosRpt>

Note: The new report must have at least one quantity reported. Type, Long and Short should be included with quantity. The quantities must be aggregated as above.

### 3.6 Compress the File(s)

After you assemble the data file, compress it using the GZIP or Winzip utility. The GZIP utility is freely available at <http://www.gzip.org>. The only acceptable file types are .ZIP or .GZ. Each compressed file should contain only one FIXML file for only one reporter and one report date (Business Date). You can not have multiple reporters or report dates within a single zipped file.

### 3.7 Connect to CFTC with Secure FTP

Connect to the CFTC FTP site at [traders.cftc.gov](http://traders.cftc.gov), and log in using your account and password. The compressed files will be submitted to the CFTC via Secure File Transfer Protocol (SFTP). Reporting firms with SFTP accounts can continue to use those accounts for Part 17 reporting.

New reporters who do not already have an SFTP account must request a Secure FTP account from the CFTC. See Appendix A: SFTP Account Registration.

### 3.8 Transmit the File(s)

Reports submitted to CFTC under Part 17 are subjected to several data quality checks before final processing and promotion into the appropriate production database tables. All messages must first pass validation against the applicable reference XML standards (e.g.,

FIXML) for well-formedness and enumerated valid value sets. Appendix B contains details of all the validations.

Note: If Report Date is same as file processing date, and if file is received before 2 PM, then the file will be processed after 2 PM.

## 3.9 Data Integrity

The inclusion of data elements reflecting counts of transactions, expirations or assignments, that resulted in day-to-day changes in positions enables reporting firms to perform an internal consistency check on position reports required to be submitted under Part 17. The day-to-day change in the size of a net position for a particular special account should equal the net value of contracts bought and sold; relevant EDRPs bought and sold; expirations, exercises, and assignments of contracts; and transfers sent and received.

More specifically, for futures positions, the day-to-day change in net position should equal:

$\Delta(\text{Net Futures Position})$

$$\begin{aligned} &= (\text{Contracts Bought} - \text{Contracts Sold}) + (\text{EFP Bought} - \text{EFP Sold}) \\ &+ (\text{EFS Bought} - \text{EFS Sold}) + (\text{Notices Issued} - \text{Notices Stopped}) \\ &+ (\text{Long Futures Assigned} - \text{Short Futures Assigned}) \\ &+ (\text{Long Transfers Received} - \text{Long Transfers Sent}) \\ &+ (\text{Short Transfers Sent} - \text{Short Transfers Received}) \end{aligned}$$

For options positions, the day-to-day change in position should equal:

$\Delta(\text{Net Option Position})$

$$\begin{aligned} &= (\text{Contracts Bought} - \text{Contracts Sold}) + (\text{EOO Bought} - \text{EOO Sold}) \\ &+ (\text{Short Options Expired} - \text{Long Options Expired}) \\ &+ (\text{Short Options Exercised} - \text{Long Options Exercised}) \\ &+ (\text{Long Transfers Received} - \text{Long Transfers Sent}) \end{aligned}$$

+ (Short Transfers Sent - Short Transfers Received)

## 3.10 Data Validation and Error Handling

Reports submitted to CFTC under Part 17 are subjected to several data quality checks before final processing and promotion into the appropriate production database tables. All messages must first pass validation against the applicable reference XML standards (e.g., FIXML) for well-formedness and enumerated valid value sets. Appendix B contains details of all the validations.

### 3.10.1 Large Trader FIXML Reference ID

The Large Trader reference ID is made up of the minimum fields required to uniquely identify the records. There are two options for key fields to this dataset. The first consists of the Unique Instrument code along with 4 other attributes in Table:1 and the second is a combination of several data elements (Table:2). Only one of the two keys must be provided.

**Table : 1 (UIC Key)**

Fut	Opt	Data Element	FIXML Path	Definition
X	X	Exchange Code	FIXML/Batch/PosRpt/Instrmt@Exch	ISO 10383 Market Identifier Code for the instrument of reported position
X	X	Unique Instrument Code	FIXML/Batch/PosRpt/Instrmt/AID@AltID(455)(@AltIDSrc=8)(456)	Unique Instrument Code
X	X	Report Date	FIXML/Batch/PosRpt@BizDt	Report Date
X	X	Reporting Firm ID	FIXML/Batch/PosRpt/Pty@ID (Src M)	CFTC-assigned identifier for the reporting firm.
X	X	Account ID	FIXML/Batch/PosRpt/Pty@ID (Src D)	Firm Assigned Special Account ID

**Table : 2 (Composite Key)**

## Commodity Futures Trading Commission

### Division of Data

### Guidebook for Part 17

The options and futures contain the same reference ID parts except the options contain the additional attributes such as put or call Indicator, and strike fields. The reference ID consists of the data elements in the table below. In the table below 'M' equals Mandatory and 'C' equals conditional. The 'Use' column describes conditions.

Fut	Opt	Data Element	FIXML Path	Definition	Use
M	M	Report Date	FIXML/Batch/PosRpt@BizDt	Position date	
M	M	Reporting Firm ID	FIXML/Batch/PosRpt/Pty@ID (Src M)	Reporting Firm Alpha Code	
M	M	Account ID	FIXML/Batch/PosRpt/Pty@ID (Src D)	Special Account of trader	
M	M	Exchange Code	FIXML/Batch/PosRpt/Instrument@Exch	ISO 10383 Market Identifier Code for the instrument of reported position	
M	M	Product Code	FIXML/Batch/PosRpt/Instrument@ID	Exchange's unique identifier for the instrument	
M	M	Product Type	FIXML/Batch/PosRpt/Instrument@SecTyp	Type of product.	
M	M	Instrument Code	FIXML/Batch/PosRpt/Instrument@Sym	Instrument Code	
M	M	Contract Date	FIXML/Batch/PosRpt/Instrument@MMY	Contract Date	
C	C	Maturity Time	FIXML/Batch/PosRpt/Instrument@MatTm	Maturity Time	If needed to identify unique product.
	C	Listing Date	FIXML/Batch/PosRpt/Instrument@Issued	Listing Date	If needed to identify unique product.

	M	Option Expiration Type	FIXML/Batch/PosRpt/Instrument@ExerStyle	Option Expiration Type	
	C	First Exercise Date	FIXML/Batch/PosRpt/Instrument	First Exercise Date	If needed to identify unique

			mt/Evnt@EventTyp=25 FIXML/Batch/PosRpt/Instr mt/Evnt@Dt		product.
	C	Strike Level	FIXML/Batch/PosRpt/Instr mt@StrkPx	Strike Level	(Strike Level or (Cap and/or Floor) ) or Alpha Strike is required
	C	Alpha Strike	FIXML/Batch/PosRpt/Inst rmt@AlphaStrk	Alpha Strike	Strike Level or Alpha Strike required
C	C	Cap Level	FIXML/Batch/PosRpt/Inst rmt@CapPx	Cap Level	(Cap and or Floor) or Strike Level
C	C	Floor Level	FIXML/Batch/PosRpt/Inst rmt@FlrPx	Floor Level	(Cap and or Floor) or Strike Level
	C	Bound or Barrier Type	FIXML/Batch/PosRpt/Inst rmt/CmplxEvnt@Typ	Bound or Barrier Type	If needed to identify unique product.
	C	Bound or Barrier Level	FIXML/Batch/PosRpt/ Instrmt/CmplxEvnt@Px	Bound or Barrier Level	If needed to identify unique product.
	C	Payout Amount	FIXML/Batch/PosRpt/Inst rmt@OptPayAmt	Payout Amount	If needed to identify unique product.
	C	Payout Type	FIXML/Batch/PosRpt/Inst rmt@OptPayoutTyp	Payout Type	If needed to identify unique product.

### 3.11 Error and Omission Correction Handling

Reporting markets shall file corrections to errors or omissions in data previously filed with the Commission pursuant to §17.00(a) using the same format, coding structure, and electronic data submission procedures previously described in this section. To correct errors or omissions a firm must resubmit ONLY the corrected records for the affected day. The records will be reprocessed and will replace the data records that have errors for that day. Data correction and resubmission must be done in a timely

---

manner. Make sure that the key data elements listed in Section 3.10.1 are included when submitting changes. This will ensure that the correct records get updated.

The examples below show scenarios when reporters should use New, Change and Delete messages. Note: The reference IDs are highlighted in blue. The action to be taken (New, Update, or Delete) is highlighted in yellow. The changes made to the data in the “Change” section are highlighted in violet.

Please forward questions regarding format, content, and transmission of Part 17 data submission to the CFTC at [Part17TechSupport@cftc.gov](mailto:Part17TechSupport@cftc.gov).

### 3.11.1 Initial Submission — New

- The account/contract has reportable activity on the reporting date

The initial report for an account/contract/reporting date must contain the action code for "New". In FIXML set FIXML/Batch/PosRpt@Actn="1". There can only be one such report per reporting date file. Include all reported quantities for the account/contract/reporting date in a single FIXML Position Report.

#### Submission Example 1: Initial Report with the Action Code of "New"

```
<?xml version="1.0" encoding="UTF-8"?>

< FIXML xmlns="http://www.fixprotocol.org/FIXML-Latest"

    <Batch TotMsg="2">

        <Hdr MsgTyp="AP" SID="ZZZ" TID="CFTC" Snt="2017-03-

</PosRpt>
```

```
</Batch> </FIXML>
```

### 3.11.2 Correct One or More Errors — Change

- The account/contract has reportable activity on the reporting date
- The initial report contains errors

Correcting errors requires resubmitting a file containing only the corrected individual Position Reports by account/contract/reporting date. Be sure to set the action code to indicate a “Change” report. In FIXML set FIXML/Batch/PosRpt@Actn=“2”. Be sure to include all the reported quantities in the corrected Position Report. Use the change report whenever the previously submitted report contained an error.

**Submission Example 2: Existing FUT and OOF Position Reports to be Updated**

**Change Example:**

```

### 1.1.2 The Entire Report Is Wrong — Delete

- There is no reportable activity for the account/contract on the reporting date

Only perform a delete action when the entire Position Report for an account/contract/reporting date was submitted in error i.e., there was no reportable activity. In order to delete an erroneously submitted report, resubmit the entire previously submitted report, being sure to set the action code to indicate a “Delete” report. In FIXML set FIXML/Batch/PosRpt@Actn=“3”. Again, this is only used when the entire report is wrong.

**Submission Example 4: Existing FUT and OOF Position Reports to be Delete****Delete Example:**

## Appendix A: SFTP Account Registration

The compressed files will be submitted to the CFTC via Secure File Transfer Protocol (SFTP). Reporting markets with SFTP accounts can continue to use those accounts for this reporting requirement. New reporters who do not already have an SFTP account, must request a Secure FTP account from the CFTC. The following steps describe the process for that request.

# Commodity Futures Trading Commission

## Division of Data

### Guidebook for Part 17

#### Registration Step 1:

Users will browse to the Account Creation Page on the Commission's website (<https://accountcreation.cftc.gov/CFTCAccount.aspx>). Users will be presented with a CFTC Usage Agreement for review.

Users will be required to confirm that they have read the agreement and agree to abide by its terms by clicking the checkbox and pressing the "Agree" button.

The screenshot shows the CFTC's website homepage with a navigation bar at the top. Below the navigation, there is a section titled "These terms of use apply exclusively to your access to, and use of, CFTC data submission systems and do not alter in any way the terms or conditions of any other agreement you may have with the CFTC." It also includes a note about changes to the terms of use, a severability clause, and a user ID and password policy. A "User ID and Password" section details how User IDs and Passwords are generated and used. A "Privacy Act Disclosure" section explains the collection of information from traders. A "Contact Information" section provides a contact email for reporting lost or stolen Passwords. An "Agreement to Terms of Use" section contains a checkbox for accepting the terms. At the bottom are "AGREE >>>" and "DECLINE >>>" buttons, along with a link to "CFTC Account Home".

U.S. COMMODITY FUTURES TRADING COMMISSION  
Ensuring the Integrity of the Futures & Swaps Markets

Transparency | Search

Industry Oversight Law & Regulation Market Data & Analysis Forms & Submissions Learn & Protect About the CFTC

These terms of use apply exclusively to your access to, and use of, CFTC data submission systems and do not alter in any way the terms or conditions of any other agreement you may have with the CFTC.

These terms of use may be changed at any time without notice by the CFTC.

If any provision of these terms of use shall be deemed unlawful, void, or for any reason unenforceable, then that provision shall be deemed severable from these terms of use and shall not affect the validity and enforceability of any remaining provisions.

**User ID and Password**  
A unique User ID and Password will be generated by the CFTC and e-mailed to the e-mail address you provide. You agree to notify the CFTC immediately if you have reason to believe your password has been lost or stolen, your account has been accessed improperly, or attempts have been made to access your account without your permission.

Only one individual or entity can use each User ID and Password. Accounts are non-transferable. User IDs and Passwords may be used only to submit valid data and may not be used for any fraudulent purposes. The CFTC reserves the right to reset any Passwords that have been lost or stolen or have not been used for more than 120 days.

**Privacy Act Disclosure**  
The CFTC is authorized to collect reports and information from traders with derivatives positions pursuant to, among other sections, Sections 2(d), 4i, 4t and 8 of the Commodity Exchange Act (7 U.S.C. 2(d), 6i, 4t and 12). The information requested is used generally to gather information concerning the size and composition of the derivatives markets and to facilitate the CFTC's market and financial surveillance responsibilities. Information collected may be used by the Commission for investigations or litigation and, in limited circumstances, may be made public in accordance with provisions of the Commodity Exchange Act. Information may also be disclosed to other government agencies, and, in certain situations, it may be disclosed to any "registered entity" (as defined in Commodity Exchange Act Section 1(a)), to any registered futures association registered under Section 17 of the Commodity Exchange Act, and to any national securities exchange or national securities association registered with the Securities and Exchange Commission to assist those organizations in carrying out their self-regulatory responsibilities under the Securities Exchange Act of 1934, 15 USC 78a, et seq.

The complete listing of routine uses of the information contained in these records, in accordance with the Privacy Act, 5 U.S.C. 552a, and the Commission's rules thereunder, 17 CFR Part 146, is found in the Commission's compilation of its System of Records Notices, 76 Fed. Reg. 5974 (February 2, 2011), as may be amended. Disclosure of the information requested is mandatory for covered individuals and organizations, and failure to comply may result in the imposition of criminal or civil sanctions.

**Contact Information**  
To report a lost or stolen Password, improper use of your account, or attempts to use your account, contact us immediately by telephone at 202-418-5600 or by email to [DCITSCSC@cftc.gov](mailto:DCITSCSC@cftc.gov).

**Agreement to Terms of Use:**  
 I have read the usage agreement and agree to abide by its terms.

After selecting the Agree button, you will be directed to a page where you can request the User ID and Password required to enter and submit data to the CFTC.

**AGREE >>>** **DECLINE >>>**

CFTC Account Home

**Registration Step 2:**

Users will be presented with the Account Creation page where they will be asked to supply:

- (1) First Name – The first name of the user requesting the account
- (2) Last Name – The last name (or surname) of the user requesting the account
- (3) Company Name – The company that will be supplying the data to the CFTC
- (4) Email Address – The email address of the contact. The email address must be from the domain that will be submitting data, i.e. the reporting market's domain. Third party email domains (e.g., Hotmail, Yahoo!, Gmail, etc.) will not be accepted.
- (5) Contact Telephone Number – The requestor's phone number, in case CFTC needs to confirm the user via a phone call.
- (6) Contact FAX Number (not required).

A screenshot of the CFTC's website showing the "Account Creation" form. The header includes the CFTC logo, the text "U.S. COMMODITY FUTURES TRADING COMMISSION", "Ensuring the Integrity of the Futures & Swaps Markets", and links for Transparency, International, and Contact Us. A search bar is also present. The main content area has a blue header bar with links for Industry Oversight, Law & Regulation, Market Data & Analysis, Forms & Submissions, Learn & Protect, About the CFTC, and News & Events. Below this, a registration form is displayed. It includes fields for Requester first name, Requester last name, Company name, Email address (with a note about domain restrictions), Confirm email address, Telephone, and Fax. There is a note about required fields and instructions for adding the CFTC to your safe senders list. At the bottom are "Submit" and "Reset" buttons, and a link to "CFTC Account Home".

Registration Restriction: [Email Confirmation Required.]

We recommend that you routinely change your password. The CFTC reserves the right to reset any Passwords that have been lost or stolen or have not been used for more than 120 days. The CFTC reserves the right to modify, suspend, deactivate, terminate or delete any account that violates any part of Submission Account Creation & User Registration Agreement. Accounts are non-transferable.

Please enter the following information:

\*Requester first name:

\*Requester last name:

\*Company name:

\*Email address:   
Email address must be the domain from which data submissions will be made.  
Third party email domains, e.g., hotmail, yahoo, will be rejected.

\*Confirm email address:

\*Telephone:

Fax:

**\*Required Field**

Before submitting your request, please add [DoNotReply@cftc.gov](mailto:DoNotReply@cftc.gov) to your address book and safe senders list to ensure that confirmation emails can reach your inbox. Also, if you have an IT department/administrator, then please ask them to ensure that your organization accepts all email from the cftc.gov domain.

[CFTC Account Home](#)

Once the user has submitted the information, the request will be passed to the CFTC's Office of Data and Technology for approval.

### Registration Step 3:

Once the account creation is approved, the user will be sent an email with a link to confirm the request. This email will include the three-letter Alpha Code that must be used for all data submissions made by this company to the CFTC.

Clicking the link (or posting the URL into a browser) will bring users to the account confirmation screen where they will be asked to confirm the account creation request by typing in the three-letter Alpha Code supplied in the email.

Once the user has confirmed the Alpha Code, the page will tell them that their request has been submitted.

**U.S. COMMODITY FUTURES TRADING COMMISSION**  
Ensuring the Integrity of the Futures & Swaps Markets

Transparency | International | Co

Industry Oversight    Law & Regulation    Market Data & Analysis    Forms & Submissions    Learn & Protect    About the CFTC    News & Events

**REQUEST ACCOUNT CREATION FOR DATA SUBMISSION TO THE CFTC**

The CFTC will review your request and send you an email after your request has been processed.

[Return to CFTC.gov](#)

## Registration Step 4:

The user will receive two emails from the CFTC. Each email will address guidelines for using the account. The first email will contain the user's new ID. It will also contain instructions on converting a non-Secure FTP Account to a Secure FTP Account. All reporting markets that are providing Part 17 reporting must use Secure FTP to transmit data. The second email will contain the user's new password for the FTP account.

The CFTC has generated a User ID and a Password to login to CFTC systems.  
For example, you can access the CFTC PERT Online system at <http://dc2kd07/PERT/LoginPage.aspx>  
User ID: [hrosen@samplereportingfirm.com](mailto:hrosen@samplereportingfirm.com)  
Password: Will be sent to you in a separate email.  
Please Review:  
• You agree to notify the CFTC immediately if you have reason to believe your Password has been lost or stolen; your account has been accessed improperly; or attempts have been made to access your account without your permission.  
• Only one individual or entity can use each User ID and Password. Accounts are non-transferable.  
• User IDs and Passwords may be used only to submit valid data. They may not be used in any way that is unlawful or fraudulent, or has any unlawful or fraudulent purpose or effect. They may not be used to knowingly transmit any data, send or upload any material that contains viruses, Trojan horses, worms, time-bombs, keystroke loggers, spyware, adware or any other harmful programs or similar computer code designed to adversely affect the operation of any computer software or hardware. Any data submission delay caused by such circumstances shall be your responsibility.  
• The CFTC reserves the right to do any of the following  
    • Reset any passwords that have been lost or stolen or have not been used for more than 120 days.  
    • Modify, suspend, deactivate, terminate or delete any account that violates any part of this agreement.  
    • Delete any file deemed "dangerous" to the health of the server without any prior notice.  
  
Secure FTP Account Creation  
If you desire a Secure FTP (SFTP) Account, please send your Public Key to [FTPSupport@cftc.gov](mailto:FTPSupport@cftc.gov).  
  
Contact Information  
To report a lost or stolen password, improper use of your account, or attempts to use your account, contact us immediately by telephone at 202-418-5600 or by email at [DclsCsc@cftc.gov](mailto:DclsCsc@cftc.gov).

## Registration Step 5:

All reporting markets must exchange their Public Keys with the CFTC to activate their Secure FTP account. Please send your Public Key to [FTPSupport@cftc.gov](mailto:FTPSupport@cftc.gov) as a text file attachment along with the account name from which the file will be transmitted. You will then receive the second email, which will contain your new password for the FTP account.

## Commodity Futures Trading Commission

### Division of Data

Guidebook for Part 17

#### File Transmission

Connect to the CFTC FTP site at [traders.cftc.gov](http://traders.cftc.gov), and log in using your account and password. The compressed file can be transferred using normal FTP commands. Please do not change the directory. As soon as the file is placed on a CFTC server, the file will be moved to the correct directory for processing. You will not be able to see the file if you include a directory listing.

Upon file receipt, CFTC software will ingest the file through the CFTC firewall and begin processing of the data.

#### Technical Support

Please forward questions regarding format, content, and transmission of Part 17 data submissions to the CFTC at [Part17TechSupport@cftc.gov](mailto:Part17TechSupport@cftc.gov).

## Appendix B: Data Validation Rules for Large Trader Position Report (LTPoS)

The submitted data will pass through three levels of validations before being accepted into CFTC systems.

The first level of validation ensures that the file meets the basic needs of the FIXML Schema. The XML must be well formed, contain mandatory tags, and the format of certain fields must meet minimum standards for the file to pass through the schema validation. A file that fails schema validation will be rejected entirely and an automated email will be sent to the reporting party. No partial storage of the data can be achieved with a file that fails schema validation. Table B-1 describes the possible schema validation errors which could be encountered. Data reporters should resubmit the corrected file.

The second level of validation occurs immediately after the schema validation has successfully completed. These are referred to as primary data validations. These data validations check for consistency and completeness regarding the data that is being reported. For instance, certain fields are required for the reporting of options, and others are required for a futures contract. An automated email will be sent to the reporting party with a listing of all the errors. Table B-2 describes the possible data validation errors which can be encountered, and identifies the FIXML tag which is causing the error, as well as the field number in the data dictionary which describes how the value should be populated. Files which contain records that fail a data validation will be processed and stored with the exception of the records which had a failing condition. Data reporters should resend files containing just the failed records.

The third level of validation occurs when the submitted records are checked against the CFTC system of record. CFTC personnel may identify that certain values were incorrect and will contact you for clarification and correction of records.

## B-1: Schema Data Validation Rules for Large Trader Position Report (LTPOS)

### Summary of Possible Schema Data Errors and Sample Error Messages.

Item	Rule Type	Rule Description	FIXML Path

## B-2: Primary Data Validation Rules for Large Trader Position Report (LTPOS)

The DD Lnk column is a reference to the Item Number in the Data Dictionary. The FIXML conditions that the @MsgTyp must be “AP” apply to all data elements. The data will be checked for the following:

Item	Rule Description	Valid Values	Error Message	FIXML Path	FIXML Condition	DD Lnk
1	Positions Report Header Required Fields.	N/A	The header must contain the following fields: @TotMsg - Total Message Count @MsgTyp - FIXML Message Type  @SID - Sender ID @TID - To ID @Snt - Message Transmit Datetime	FIXML/Batch@TotMsg FIXML/Batch/Hdr@MsgTyp FIXML/Batch/Hdr@SID FIXML/Batch/Hdr@TID FIXML/Batch/Hdr@Snt		Item 1 Item 2 Item 3 Item 4 Item 5
2	The Total Message Count must equal number of messages submitted.	N/A	The Total Message Count does not equal the number of records loaded. @TotMsg - Total Message Count	FIXML/Batch@TotMsg		Item 1

```

### Division of Data

@MMY = [Contract Date](futures delivery year and month or options expiration year and month)

formats YYYYMM for month, YYYYMMDD for day, YYYYMMwN for week. A specific date

or can be appended to the MaturityMonthYear. For instance, if multiple standard products exist that mature in the same Year and Month, but actually mature at a different time, a value can be appended, such as "w" or "w2" to indicate week as opposed to week 2 expiration. Likewise, the date (0-3) can be appended to indicate a specific expiration (maturity date).

@StrkPx = [Strike Price] (for options only, format decimal number, e.g., 0.0000000000; )

@PutCall = [Option Type] (0 = Put, 1 = Call; only used for Options)

@Exch = [Exchange Code] ) -->

<Instrmt ID="String" Src="H" MMY="201210" StrkPx="0.0000000000" PutCall="0" Exch="[Use ISO code.]"/>

<!-- Settlement Instrument Position Information -->

<PosUnd>

<!-- Settlement Instrument Contract Information

@ID = [Settlement Instrument – Product Code= Cleared Product ID]

@Src = H (1 = CUSIP, 2 = SEDOL, 3 = QUIK, 4 = ISIN number, 5 = RIC code, 6 = ISO Currency Code, 7 = ISO Country Code,

8 = Exchange Symbol, 9 = Consolidated Tape Association (CTA) Symbol (SIAC CTS/CQS line format), A = Bloomberg Symbol, B = Wertpapier, C = Dutch, D = Valoren, E = Sicovam, F = Belgian, G = Common (Clearstream and Euroclear), H = Clearing House / Clearing Organization, I = ISDA/FpML Prod XML, J = Option Price Reporting Authority,

K = ISDA/FpML Prod URL, L = Letter of Credit, M = Marketplace-assigned Identifier, S = FIGI)

@MMY = [Settlement Instrument - Contract Date]. (formats YYYYMM for month, YYYYMMDD for day, YYYYMMwN for week.) A specific

date or can be appended to the MaturityMonthYear. For instance, if multiple standard products exist that mature in the same Year and Month, but actually mature at a different time, a value can be appended, such as "w" or "w2" to

indicate week as opposed to week 2 expiration. Likewise, the date (0-3) can be appended to indicate a specific expiration (maturity date). -->

## Appendix E Legacy File Format

The legacy file format is the current Large Trader 80 byte format, which is to be converted to FIXML. Once converted to FIXML, the 80 byte format will become obsolete. This information is relevant to the transition only.

Except as otherwise approved by the Commission or its designee, all required records shall be submitted together in a single file. Each record will be 80 characters long. The specific record format is shown in the table below, where “AN” = alphanumeric, “S” = signed numeric, and “N” = numeric.

Beginning				
Column	Length	Type	Name	Position
1	2	AN	Report Type	1-2
3	3	AN	Reporting Firm	3-5
6	2	-	Reserved	6-7
8	12	AN	Account Number	8-19
20	8	AN	Report Date	20-27
28	2	AN	Exchange Code	28-29
30	1	AN	Put or Call	30
31	5	AN	Commodity Code (1)	31-35
36	8	AN	Expiration Date (1)	36-43
44	7	S	Strike Price	44-50
51	1	AN	Exercise Style	51

52	7	N	Long-Buy-Stopped	52-58
59	7	N	Short-Sell-Issued	59-65
66	5	AN	Commodity Code (2)	66-70
71	8	AN	Expiration Date (2)	71-78
79	1	-	Reserved	79
80	1	AN	Record Type	80

## Commodity Futures Trading Division of Data

### Guidebook for Part 17

1. **Report type.** This report format will be used to report three types of data: long and short futures and options positions, futures delivery notices issued and stopped, and exchanges of futures for a commodity or for a derivatives position bought and sold. Valid values for the report type are “RP” for reporting positions, “DN” for reporting notices, and “EP” for reporting exchanges of futures for a commodity or for a derivatives position.
2. **Reporting firm.** The clearing member number assigned by an exchange or clearing house to identify reporting firms. If a firm is not a clearing member, a three-character alpha-numeric identifier assigned by the Commission.
3. **Account Number.** A unique identifier assigned by the reporting firm to each special account. The field is zero filled with the account number right-justified. Assignment of the account number is subject to the provisions of paragraph (b) of this section and appendix A of this part (Form 102).
4. **Report date.** The format is YYYYMMDD, where YYYY is the year, MM is the month, and DD is the day of the month.
5. **Exchange.** This is a two-character field approved by the Commission to identify the exchange on which a position is held.
6. **Put or Call.** Valid values for this field are “C” for a call option and “P” for a put option. For futures, the field is blank.
7. **Commodity (1).** An exchange-assigned commodity code for the futures or options contract. This is the human readable ticker value.
8. **Expiration date (1).** The date format is YYYYMMDD and represents the expiration date or delivery date of the reported futures or options contract. For date-specific instruments such as flexible products, the full date must be reported. For other options and futures, this field is used to report the expiration year and month for an options contract or a delivery year and month for a futures contract. The day portion of the field for these contracts contains spaces.
9. **Strike price.** This is a signed numeric field for reporting options strike prices. The strike prices should be right-justified and the field zero-filled. Strike prices must be reported in the same formats that are used by an exchange. For futures, the field is left blank.

R	9	-

10. **Exercise style.** Valid values for this field are “A” for American style options, i.e., those that can be exercised at any time during the life of the options; and “E” for European, i.e., those that can be exercised only at the end of an option's life. This field is required only for flexible instruments or as otherwise specified by the Commission.
11. **Long-Buy-Stopped (Short-Sell-Issued).** When report type is “RP”, report long (short) positions open at the end of a trading day. When report is “DN”, report delivery notices stopped (issued) on behalf of the account. When report type is “EP”, report purchases (sales) of futures for a commodity or for a derivatives position for the account. Report all information in contracts. Position data are reported on a net or gross basis in accordance with paragraphs (d) and (e) of this section.
12. **Commodity (2).** The exchange assigned commodity code for a futures contract or other instrument that a position is exercised into from a date-specific or flexible option. This is the human readable Options Futures underlying ticker value.
13. **Expiration date (2).** Similar to other dates, the format is YYYYMMDD and represents the expiration date or delivery month and year of the future or other instrument that a position is exercised into from a date-specific or flexible option.
14. **Record type (1).** Record type is used to correct errors or delete records that have previously been submitted. Valid values are “A”, “C”, “D” or “blank”.  
An A or “blank” is used in this field for all new records. If the record corrects information for a previously provided record, this field must contain a “C” or “blank” and the record must contain all information on the previously transmitted record. If the record deletes information on a previously provided record, this field must contain a “D” and all information on the previously transmitted record.

## Appendix F: Map Part 17 Large Trader Data to FIXML

The legacy 80 byte Large Trader Position Reports should be mapped to the FIXML standard as follows. The first column is the Legacy 80 Byte Large Trader field name. The four additional columns list the FIXML equivalent for the resulting XML Xpath, the FIXML tag #, the valid FIXML values, and the name of the FIXML field name.

Item	Legacy Field Name	FIXML	FIX Tag	Valid Values	FIXML Data Element(s)
1	Report Type	FIXML/Batch/PosRpt/Qty@Typ	703	FIN = End-of-Day position TOT=Total Contracts for Day EP = Exchange for Physical DN = Delivery Notice ES = Exchange for Swaps EO = Exchange for Options  Note: Exchange for Swaps and Exchange for Options are added in order to align with Part 16.	Position Type
